Vectra's Security Health Check Service

The Security & Continuity Group concentrates on security risk reduction to your organisation's physical, information, personnel and personal assets.

Physical, technological and procedural systems implemented to protect your organisation require regular maintenance to ensure effective, robust operation. We believe an essential component of your risk management strategy should be the requirement for impartial audit and review.

Vectra's experienced consultants can provide a thorough, independent report of your current security and continuity measures, with the aim of ensuring that consistency between all your operations is established; your security policy requirements are adhered to; and your overall strategy is developed and progressed.

To achieve this, Vectra is able to conduct a series of surveys to:

- Identify existing vulnerabilities and gaps in your current security measures.
- Recommend options to close any gaps that are found to exist.
- Aid your organisation in establishing a security base line from which to build your future security strategy.
- Recommend additional and appropriate strategies across individual business locations, so as to ensure streamlining of security operations throughout your organisation.

The Survey Report produced will detail any recommendations for improvement. Should you wish, Vectra will also be able to bring to bear considerable experience in implementing the recommendations, thereby providing a complete security health check lifecycle.

Vectra Security & Continuity consultants have provided Security & Continuity support to:

- Network Rail
- The Belgian Transport Ministry
- Tube Lines Ltd
- Bluewater Energy Services BV (Netherlands)
- The Irish Department of Communications, Energy and Natural Resources
- Dragon LNG Ltd
- Statoil ASA (Shekoa Port, Peoples Republic of China)
- The Royal Bank of Scotland Group
- EADS Astrium Ltd
- Amey
- Interserve Ltd
- Mizuho International
- Hampshire Constabulary

Vectra Group Limited provides a customised service to meet the needs of each project
